

F088AP Ruler Foot for High Shank

Catalogue/Description Information

Key short word summary

(sub 25)

F088AP Ruler foot used with high-shank machines for quilting with rulers or templates. Achieve a ¼" stitch when the needle is in the centre position.

Key mid word summary

(sub 50)

Use the F088AP Ruler foot with high-shank machines when quilting with rulers or templates. Higher sides prevent rulers from sliding under the needle, and a shaped stitching area assists to avoid skipped stitches. When the needle is in the centre position, a perfect ¼" to either side of the needle is achieved.

Key long word summary

(sub 100)

The F088AP Ruler Foot is designed to be used with high-shank machines when quilting with rulers or templates. The oval stitching area assists to avoid skipped stitches, and the edge of this ruler foot is higher/thicker to prevent the ruler from sliding under the needle as you are stitching. Finished with a polished coating rulers will glide easily against the foot. With a diameter of ½", when the needle is in the centre position, achieve a perfect ¼" to either side of the needle. Easy to attach and suitable for use with the needle threader when the foot is attached.
